

TechNova Solutions

Senior Python Backend Engineer

Location: Bengaluru (Hybrid) | Type: Full-time

ABOUT THE ROLE

We are seeking an experienced Senior Python Backend Engineer to design, build, and maintain high-performance web services for our cloud platform.

REQUIREMENTS

- 4+ years of experience in backend software development
- Strong proficiency in Python and the Django web framework
- Experience designing and building REST API services
- Hands-on experience with PostgreSQL database design and optimisation
- Proficiency with Docker for containerisation and deployment
- Experience with AWS cloud services (EC2, S3, RDS, Lambda)
- Working knowledge of Linux-based systems (Ubuntu / CentOS)
- Familiarity with Redis for caching and session management
- Experience with Kubernetes for container orchestration and automated deployments

RESPONSIBILITIES

- Architect and implement backend services using Python and Django
- Design and maintain REST API endpoints for web and mobile clients
- Manage PostgreSQL schemas and optimise queries for performance
- Containerise applications using Docker; deploy to AWS infrastructure
- Configure Redis caching strategies to improve application throughput
- Orchestrate containerised workloads with Kubernetes in production environments
- Develop and maintain services on Linux production servers

PREFERRED (GOOD TO HAVE)

- Experience with container orchestration platforms
- Familiarity with infrastructure-as-code tools
- Knowledge of graph-based query languages
- Experience with non-relational document databases

WHAT WE OFFER

- Competitive salary and ESOPs
- Flexible hybrid work arrangement
- Learning budget and conference sponsorship
- Health and wellness benefits
